

Flashing board with twin LED lamp

Flashing board is a traffic sign with a signalling twin lamp to be placed primarily inside towns to highlight critical places (e.g. pedestrian crossing, dangerous road curve).

- > **twin LED lamp** ø200mm **EN 12352 L8H**
- > lamps flashing in an **asynchronous mode**
- > electronics automatically reduce lamp luminous intensity at night
- > moreover, the electronics include reverse polarity protection and protect the battery from deep discharge
- > 2m power supply cable
- > traffic sign with the **dimensions (WxH) 1000x1000mm (three brackets)**
- > the flashing board can be **attached by standards brackets for traffic signs** on a pole of at least ø60mm or via a "street light bracket" on the poles of public lighting by a steel band (not part of the delivery)
- > examples of traffic signs on the flashing board of retroreflective sheeting (class RA1): Slippery road, Watch out for children, Tram, Pedestrian crossing (to be specified in the order)
- > other dimensions (WxH) of the traffic sign are 1000x1500mm (six brackets), which enables to place additional boards with text (e.g. SCHOOL, WATCH OUT FOR CHILDREN)
- > standard colour of the background of the board with the traffic sign is white, but can also be supplied with a fluorescent retroreflective sheeting
- > **power supply options are listed under Accessories:** by a rectifier transformer, from street lighting or solar cells
