

Light arrow SS15 LED with frame

Light arrow is a signalling device used for maintenance vehicles, gritters, road sweepers, marking vehicles and trailers, or it can be used for indicating road works and the direction of its drive-around. This light arrow is also described as **Light arrow and cross type B**, warning arrow or signalling arrow. The light arrow can be supplemented by two warning lamps or beacons of different types to improve the warning effect.

- > **15 LED lamps** ø200mm **EN 12352 L8H**
- > main advantage of the light arrow with 15 lamps is a more visible symbol of cross
- > electronics automatically reduce lamp luminous intensity at night and includes reverse polarity protection
- > moreover, the electronics protect the battery from deep discharge by disconnecting the light arrow symbols and possibly also the upper warning lamps depending on the current battery status
- > **remote control with 15m cable** for control and optical check of the function modes
- > the light arrow has the following modes: arrow to the left, arrow to the right and cross
- > all operational information are clearly displayed on the remote control
- > **standard 10m power supply cable** to be installed on the vehicle (upon request, 4m power supply cable with battery clips)
- > light arrow can easily be attached to a profile with a maximal width 40mm
- > two warning lamps or beacons of different types can be added to the light arrow to improve the warning effect

LIGHT ARROW SS15 LED WITH VLS-2
SUPPLIED FROM BATTERY 12V/180AH
KEEP FLASHING NONSTOP FOR UP
TO 6 DAYS

Technical data for consumption refer to the light arrow only.

TECHNICAL DATA

Power supply	12/24V=
Current consumption 12V=	day 1,0A night 0,4A
Average consumption 12V=	16,4Ah / 24 hours
Current consumption 24V=	day 0,55A night 0,23A
Average consumption 24V=	9,2Ah / 24 hours
Flashing frequency	60/min.
Dimensions (WxHxL)	1300x1440x240mm
Weight	23kg
