

NZSP-1_01 Motor-operated board lifting and arrow rotation MZS+MOS 12V

The motor-operated board lifting enables to lift or lower the board by a linear actuator. The arrow rotating device automatically rotates the white arrow on the blue round traffic sign. Both can be controlled from the cabin of the towing vehicle using a remote control.

- > the board is controlled by remote control and lifted/lowered by a compact and robust linear actuator
- > the motor has a bolt enabling manual lifting or lowering of the board in case of failure or emergency
- > light arrow symbols are controlled by remote control and the white arrow on the blue round traffic sign is rotated automatically by a motor
- > in case of failure or emergency, the white arrow can also be set manually
- > position of the board and operational information are displayed on the remote control with a 15m cable
- > electronics protect the motor and the frame construction against overloading using a current-limit protection

TECHNICAL DATA

Power supply	12V=
Current consumption 12V=	max. 15A
Protection degree	IP55
Weight	18kg

ENHANCES ROAD SAFETY AND
PRIMARILY THE SAFETY OF THE
TRAILER OPERATORS
