

NZSP-Triangl_01 Motor-operated board lifting MZS 12V

The motor-operated board lifting enables to lift or lower the board by a linear actuator from the cabin of the towing vehicle using a remote control.

- > the board is controlled by remote control and lifted/lowered by a compact and robust linear actuator
- > the motor has a bolt enabling manual lifting or lowering of the board in case of failure or emergency
- > position of the board and operational information are displayed on the remote control with a 15m cable
- > electronics protect the motor and the frame construction against overloading using a current-limit protection
